NEW PRODUCT ANNOUNCEMENT

July 18, 2017

Dear Healthcare Provider,

Bunnell Inc. is proud to announce the upcoming release of the new LifePulse® High Frequency Ventilator - Model 204!

With 35 years of experience, Bunnell provides proven, unique High-Frequency Jet Ventilation technology in the new LifePulse for the treatment of critically ill babies with ventilator-induced lung injuries*.

The new LifePulse Model 204 ventilator includes these benefits and features:

- Built-in Battery provides uninterrupted therapy
- 45% Smaller and Lighter, with optional pole-cart stand
- Prioritized High, Medium and Low Alarms
- Simplified controls with improved user interface
- Oxygen Sampling Port
- Recessed Humidifier with quiet water pump
- Patient Box connects to front of ventilator
- Handle on top for easy lifting and mobility
- Updated Electronics: Fulfills the requirements of IEC 60601-1:2005 Ed: 3 and conforms to AAMI ES60601-1, IEC 60601-1-6 & 60601-1-8 and Certified to CSA C22.2 NO. 60601-1

Free Trials, Training, and Education
24/7 Support on the Bunnell Hotline: 800-800-HFJV

Orders are now being accepted. Shipping and rentals of the new LifePulse HFJV will begin September 2017.

- Each LifePulse HFJV Model 204 includes 1 WhisperJet™ Patient Box Model 314. Please note this is a new model of Patient Box and it is not compatible with the Model 203 Ventilator. Bunnell Inc. recommends hospitals have at least 1 extra Patient Box for backup.
- Trade-in allowances are available for the Model 203 Life Pulse HFJV, along with credit for select ventilator trades.
- Following training, hospitals may rent the LifePulse HFJV Model 204 (with 2 patient boxes) on a Monthly rate, shipped from Salt Lake City, Utah. Same-day delivery may be available, with optional overnight or 2nd day delivery service.
- The Model 203 Life Pulse HFJV will continue to be available for rent with no change to rates or availability.

For quotation and pricing, or other information, email info@bunl.com or visit www.bunl.com.

A copy of this letter is being mailed to the Director of Respiratory Care and the Director of Neonatology. If additional individuals or departments require notification, please distribute this document accordingly.

If you have questions or require additional information, please call 800-800-HFJV.

* The LifePulse HFV is indicated for ventilating critically ill infants with PIE or RDS complicated by pulmonary air leaks who are, in the opinion of their physicians, failing on conventional ventilation.
