

Service Contracts

Bunnell Incorporated recommends that the Life Pulse and Patient Box receive preventive maintenance annually to ensure safe and reliable operation. Hospitals that do not have a service contract can request a copy for review.

Hospitals spend approximately 80% of the cost of the service contract when they pay for annual preventive maintenance and the cost of replacement equipment while their equipment is being serviced. For just a few more dollars per month, you can eliminate any costly unplanned expenditures.

Service Contracts make sense: preventive maintenance, repairs (both parts and labor), software upgrades, loaners while your equipment is being serviced, and emergency loaners delivered within 1-4 hours nationwide are all covered by the service contract. Why risk equipment down time when you can guarantee coverage for the entire year? For additional information customer service at **800.800.4358 ext. 6**.
